

STEP

Surface Mount Tape Light Extrusion

Perfect for theater step light applications and safety lighting, the Step extrusion features non-slip grip strips as well as toe-kick channel for tape light illumination. Available in one meter lengths, the Step extrusion can be field cut to length and applied on site with optional end caps for finishing touches.

- Step light extrusion that provides safety with toe kick lighting
- Best suited for light commercial applications or theater stair lighting
- Features rubber grip strips for added safety
- Frosted lens that protects lights source
- Aluminum extrusion provides excellent heat dissipation
- Easy screw down installation
- Field cuttable extrusion and lens
- Compatible with 10mm wide tape light
