Plenum Cable Ties

Most commonly used in plumbing; electrical (low and high voltage), heating or air conditioning (HVAC) applications where ductwork or plenum cable (CAT5) is being installed in dropped ceilings or below raised floors. Other applications that may require plenum include fire alarms and security safety systems, computer installations and network cabling. Our plenum cable ties are made of a specialized nylon that is self-extinguishing and releases non-toxic fumes in the event of a fire, which makes our plenum cable ties paramount for reducing risk in air handling spaces.

FEATURES

- HVAC Extra Heavy-Duty
- AH-2 Plenum Rated
- V-2 Flame Rated
- 36" and 48" length

49-436P

36" 92 cm

HVAC Extra Heavy-Duty
V-2 Flame Rated
Servicio pesado extra HVAC
Para uso en llamas V-2
Extra-robuste CVC
Classe d'inflammabilité V-2

Features
- 36" and 48" length
- 180lb(800N) Tensile Strength
- Temp Rating: -40°F to 185°F (-40°C to 85°C)
- AH-2 Plenum Rated
- V-2 Flame Rated
- UL listed

Benefits
- Multi-purpose heavy duty cable tie
- Ideal for HVAC applications
- Self-Extinguishing: If there is a fire plenum ties reduce the risk of a fire spreading and emit non-toxic fumes unlike standard cable ties.
