Z-WAVE RELAY MODULE

MODEL NO: ZWN-RSM1-PLUS

DESCRIPTION

The ZWN-RSM1-PLUS is a single relay switch module that can turn any wall switch into a smart switch with Z-Wave technology. A technologically advanced relay that can be manually controlled with conjoining switch or remotely through the Z-Wave network. Features pre-programmed and customizable functions: set scenes, schedules, or connect to a motion sensor. Requires in-wall installation with hard-wired connections.

FEATURES

- Alexa/Google Home voice control compatible - requires a Z-Wave Hub
- Increased energy efficiency with our Smart Meter Energy Monitoring technology
- Works with all certified Z-Wave devices (backwards compatible)
- Requires in-wall installation with hard-wired connections - neutral wire required
- Compatible with different loads
- Control many devices with a single controller locally, or via a computer/ mobile phone remotely
- Wireless range: up to 100 feet (30 meters)

SPECIFICATIONS

Amperage	10 Amp
Voltage	120/277VAC, 50/60 Hz
Signal Frequency	908.42 Mhz
