Magnetic Retrofit Bar Kit

Product Description:

The Magnetic Retrofit Bar Kit (MRBK) installs into existing troffers without the need to enter the ceiling space, giving facility managers the quickest, most cost effective means of replacing outdated fluorescent lighting systems with the high efficiency and performance of LEDs.

With options to select from two sizes (2' and 4') and in combination with a Multi-Channel/Multi-Output driver, this kit can be ordered in 1, 2, 3 or 4 bar combinations to replace almost all office lighting needs. With a easy to install magnetic back, MRBK typically takes less than 10 minutes to install.

Features:

- Kit includes Driver + Linear Bar + mounting hardware. No lamp socket needed
- Magnet on the back for easy installation
- UL 1598C Classified Retrofit Kits
- UL Class 2 Low Voltage System
- Long life 50,000 hours
- Universal Input 120/277V
- 0-10V Dimming
- Aluminum backing for provides excellent thermal dissipation
- Multi Channel/Multi output driver for 3 Light levels in each kit
- Field installable Sensor and Emergency BBU available

Ordering Information

FAMILY		LENGTH	BAR QTY ²	LENS	CURRENT SETTING		CCT
MRBK= Magnetic Retrofit Bar Kit ¹	-	2= 2 ft. 4= 4 ft.	1L= 1 bar 2L= 2 bar 3L= 3 bars 4L= 4 bars	F= Frosted	L= Low Setting (250MA) M= Medium Setting (300MA) H= High Setting (360MA)	-	40= 4000K

¹Though ordered as a kit, all bars and drivers will be shipped bulk packed

²The driver included will be specific to the Qty of bars/kit
 Contact Maxlite for alternate options not listed on Order Structure.

Wiring instructions for different settings

The Maxlite Magnetic Retrofit Bar Kit can be used at three different settings – Low, Medium and High. The Line wires are split into 2 namely L1 and L2. Please refer to the following table to adjust the settings based on the requirements:

Output Current Selection		
Input Line (L)	Driver setting	Output current
L2 (BLK/WHT)	Low	250mA
L1 (BLK)	Medium	300mA
L1 + L2	High	360mA

1. Connect the (+) Line supply wire to the L1 (BLK) or L2 (BLK/WHT) or both based on requirements.
2. Connect the (-) COMMON supply wire to the N (WHITE).
3. Connect the supply ground wire to the green wire on the fixture.
