

BRM SERIES INDUSTRIAL INFRARED HEATER

IDEAL SPACES

- Wastewater Treatment Plants
- Loading Docks
- Foundries
- Auto or Marine Repair Facilities
- Walkways
- Assembly Areas
- Enclosed Smoking Areas
- Indoor/Outdoor Storage Areas

ENCLOSURE TYPE

- Stainless Steel

ELEMENT TYPE*

- Metal Sheath

REFLECTIVE ANGLE

- Ideal for permanent supplemental, spot heating where dependence on air movement is impractical
- High-watt density and industrial design provides a durable source of heat
- Units are rated to be permanently mounted in the horizontal position
- Heavy-duty U-Bend element
- Electric heaters convert energy to heat at 100% efficiency
- Optional safety grilles are available
- Heater has sealed wiring compartment that allows units for washdown

NOTE: *Metal Sheathed: used indoors or outdoors in high-traffic areas. Maintain at least 5 ft. in radiant path, between bottom of heater and combustible material. Pigtail element leads for a more positive connection in high-traffic areas where physical abuse.

BRM SERIES INDUSTRIAL INFRARED HEATER

NOTE: See page 124 for infrared accessories. Ground Fault Detection: Ground fault detection equipment is designed to monitor for any gradual changes in the insulation level due to humidity or mechanical damage as it develops, thus, de-energizing the load to prevent arcing type faults, preventing premature element failure and potential fire damage. As a safety precaution it is highly recommended that industrial infrared heaters must be protected by ground fault detection. Failure to comply could result in a building fire or serious equipment damage.
