

**STOP GUESSING
START MAPPING**

THIS IS NOT YOUR FATHER'S BREAKER FINDER

Locating circuits is time consuming because of poorly labelled electrical panels & a lack of proper site documentation. Manually typing labels can be cumbersome and painfully redundant.

Electrical records are prone to being out of date, hard to read, and insufficiently detailed or missing all together. It doesn't have to be this way anymore. We can help you recapture the right information needed to complete the job fast.

- ✓ Travel less by using multiple mappers simultaneously
- ✓ Map further with our ability to locate at any distance
- ✓ Be 100% accurate using our innovative technology
- ✓ Digitize all of your electrical information with CircuitIQ

GOOD FOR ALL PROPERTY TYPES
