

SYLVANIA Lamps

LEDlescent™ T8 8ft 2-Piece Ballast-Free Lamps

Application

LEDlescent T8 and T8HO Ballast-Free lamps are an energy saving alternative, designed to replace traditional fluorescent T8/T12 lamps by bypassing the existing ballast. These LED T8 lamps contain no mercury, provide instant light and a uniform light distribution. Engineered to operate directly on 120-277V, these lamps minimize labor and recycling costs. Our revolutionary design features two four-foot pieces that connect making logistics easier and more cost efficient. These lamps are constructed with PET shatter resistant film to contain components should the tube break. Available in 8-foot lengths but ships in two 4-foot sections, saving money on shipping and storage, and minimizes the opportunity for breakage in the process.

When installing the LEDlescent T8 lamps, the UL rating of the existing fixture is not voided (even when it is electrically modified) since our LEDlescent T8 lamp is UL Classified (as a luminaire conversion retrofit kit) under UL standard 1598C. UL 1598C is the standard covering LED retrofits intended for an existing UL rated fixture. Since the user is retrofitting with a UL1598C classified LED kit, the installer must follow the installation instructions included with the lamps for the modified fixture to retain its UL rating.

Benefits and Features

- Industry changing two-piece snap-fit design that is available in two wattages: 36W and 42W
- Frosted glass optics with shatter-resistant PET coating
- 36W available in FA8, Single-Pin base
- Base Flexibility: 42W Lamps ship with FA8 base (single-pin) but kit includes R17D (recessed double-contact) base to allow for retrofit into T8 or T12 Slimline (FA8) or T8HO applications (R17D)
- Kit includes bracket and screw for support in the middle of the lamps
- Double-ended wiring configuration
- CCT: 3000K, 3500K, 4100K, 5000K
- Beam angle: 200°
- Safety circuit prevents current from flowing through the lamp when only one end is engaged in the socket thereby eliminating potential shock hazard
- No risk of electrical arcing between the lamp pins and the lamp holders
- Suitable for dry and damp locations (cannot come in direct contact with water)
- Suitable for open and enclosed fixtures

Wattage Comparison

Traditional Source	Traditional System Wattage	LED System Wattage	Energy Savings*
F096T8 w/QHE 2X59 T8/UNV ISN	109	72	34%
F096T8 w/QHE 2X59 T8/UNV ISN	109	84	23%
F096T8HO w/QHE 2X86 T8HO/UNV PSN	182	84	54%

*Energy savings over life of lamp calculated at \$0.11/kWh
If replacing T12 Slimline, savings is greater than 55%

- These lamps have been tested and approved with some 0-10V dimmers
- No warm-up time, instant-on with full light output and stable lamp-to-lamp color

Electrical

- Input voltage range: 120-277V_{AC}
- Input voltage tolerance: ±10% (108V-305V)
- Power Factor >0.9
- THD <25%

Rated Life

- 50,000 hours (L₇₀)

Warranty

- 5-year limited lamp warranty (24/7 operation)
- NLB Trusted Warranty Program

Ambient Operating Range

- -4°F to +113°F (-20°C to +45°C)

Features

2-piece design

Allows for ease of shipping and storing on standard pallets

Accessories

The 42W lamp ships with interchangeable bases to allow for retrofit into Single-Pin or Recessed Double-Contact applications

Base

36W has FA8 base
42W ships with FA8 and includes R17D for HO applications

Magnetic Clip

All lamps ship with a magnetic clip and screw to ensure stability in the center of the lamp

Application Information

1. Please read and comply with all instructions before attempting installation.
2. All installation, inspection, and maintenance of lighting fixtures should be done with the power to the fixture turned off. Lamps should be installed and operated in compliance with the National Electrical Code (NEC), Underwriters Laboratories Inc. (UL) requirements, and all applicable codes and regulations.
3. Please do not install LED lamps and fluorescent lamps in the same fixture.
4. Ensure lamp holders/sockets are in good operating condition before installation.
5. Best practice: cap off the remaining ballast wires should the ballast be left in the fixture after disconnecting.
6. To prevent wiring damage or abrasion, do not expose wiring to edges of sheet metal or other sharp objects. Do not make or alter any open holes in an enclosure of wiring or electrical components during kit installation.
7. When using LEDlescent lamps, to conform to UL, you MUST affix the luminaire warning sticker, included inside the packaging, to the fixture during installation.
8. EM ballast that operates with fluorescent ballasts must be disconnected from the lamps.
9. Make sure the lamps have the proper connections before restoring power.
10. Operating temperature range between -4°F and 113°F (-20°C and 45°C).
11. Suitable for use in dry and damp environments.
12. For detailed warranty information, please see www.ledvanceUS.com.
